

TriCircle, Inc., is a Connecticut-based 501(C)(3) non-profit organization committed to breaking the cycle of relapse and recidivism inherent in the current system of rehabilitation and recovery. We are dedicated to providing real, long lasting solutions to substance abuse and co-occurring mental health challenges.

Our target client age group is young adults between the ages of 18 to 29 years old. These young adults are facing challenges with alcohol and drug addiction that are having a devastating impact on their lives, families, and society. TriCircle, Inc. will offer young adults the tools needed to rebuild their lives and futures and to live in long-term recovery from substance abuse and co-occurring mental health issues.

TriCircle, Inc. has a unique treatment model:

The most common method of substance abuse treatment available today is a 30-day in-patient treatment program, but the success rate of these programs is poor. It is reported that 40% to 90% of people relapse after treatment. It is well documented that success rates increase in direct proportion to the length of the program. TriCircle, Inc.'s unique model for treatment of young adults with substance abuse and co-occurring mental health challenges will include a 15-month program divided into three, five-month cycles that will include but not be limited to:

- An uninterrupted continuum of care
- Intake processing that considers the individual needs of each participant
- Thorough understanding of underlying issues, such as anxiety, depression, trauma and development of positive methods to cope with those issues
- Help with development of life skills, accountability, purpose, and relationships with themselves, their peers, their families and their communities
- Provision of money management courses and issuing of a bank account, in partnership with Liberty Bank, designed to teach budgeting and creating or re-establishing credit
- Payment of stipends in exchange for work performed by participants to help sustain the organization
- Guidance in the creation of a resume, earning a GED, navigating the pardon process, driver's licenses, job interviews, job training and real work experience
- Providing exposure to holistic approaches to healing, the benefits of good nutrition and exercise, and community service experience (giving back)
- Coordination of opportunities to extend a client's experience during the recovery phases and long after graduation
- Building mutually beneficial relationships with organizations and businesses to provide job training and hands on experience during the three phases of recovery and after graduation. Among the targeted industries are hospitality, manufacturing, general automotive and small engine repair, marketing, communication, and retail

The young adults participating in our program will have the best chance for success. They will gain new and positive experiences while preparing and reinforcing opportunities for their long-term recovery and a bright future. Our graduates will be able to take their cumulative experiences and learning into the community and become productive, responsible members of society.
